Projects

Full-Stack Web Integration Demo

- Deployment Links: [🔗 link](#)
- GitHub : github.com/kb-patel2005/myecommarce-ui | <https://github.com/kb-patel2005/docker-apis.git>
- This project showcases a complete e-commerce workflow with a Figma-designed UI and integrated Google Pay demo. It includes user authentication, cart management, and product handling features. The backend was containerized with Docker and deployed on Render, while the frontend was hosted on Netlify, ensuring a smooth and scalable deployment pipeline.

Fore-Ever

- Live Project Link : [🔗 link](#)
- GitHub : <https://github.com/kb-patel2005/Forever-Website.git> | <https://github.com/kb-patel2005/ForeEver-Backend.git>
- This website like Instagram. Forever emphasizes responsive design and real-time interactivity.
- Two user chat with each other. Show own follower ,and which persons are following. Both backend and frontend were deployed on Render and Netlify, respectively, for reliable performance. For secure chat and account use JWT.

- The frontend was built with Tailwind CSS, Next.js . Backend was Built using NodeJS . WebSocket integration enabled live updates.

Airport System

- Live Project Link: [🔗 link](#)
- GitHub : github.com/kb-patel2005/Airport-system-API | github.com/kb-patel2005/Airport-system
- The Airport System emphasizes responsive design and real-time interactivity. The frontend was built with Tailwind CSS, while pageable Spring Boot APIs were connected through Redux reducers. WebSocket integration enabled live seat updates, enhancing user experience. Both backend and frontend were deployed using Docker on Render and Netlify, respectively, for reliable performance.

Make My Tour

- Live Project Link : [🔗 link](#)
- GitHub : <https://github.com/kb-patel2005/makeMyTour-Frontend.git> | [github.com/kb-patel2005/MyRide BackendAPI](https://github.com/kb-patel2005/MyRide-BackendAPI)
- The Make My Tour emphasizes responsive design and real-time interactivity. The frontend was built with Tailwind CSS, while pageable Spring Boot APIs were connected through Redux reducers. WebSocket integration enabled live updates. Both backend and frontend were deployed using Docker on Render and Netlify, respectively, for reliable performance.

Education

- Bachelor of Engineering (Information Technology) –
- Government Engineering College, Gandhinagar | Current CGPA: 8
- 12th Standard (HSC): 93 PR
- 10th Standard (SSC): 90.91 PR

Experience

Relevant Skills

- Worked on Make My Tour real-time website development and gained practical project experience.
- Role – Full stack web developer
